

W.T.DHILSHAN

Software Engineer

+9477 8469588 shandhilshan0801@gmail.com linkedin.com/in/dhilshan-wt23 github.com/Dhilshan01

Summary

Results-oriented Software Engineering undergraduate with hands-on experience building full-stack web applications using modern technologies including React, Node.js, Express, PostgreSQL, and REST APIs. Proficient in Java, Python, and JavaScript with a strong foundation in OOP, JWT-based authentication, database design, and agile development practices. Demonstrated ability to deliver end-to-end solutions from normalized database schemas to responsive component-based UIs and a proven track record of applying software engineering principles to real-world products. Seeking a Software Engineer role to contribute to innovative product development.

Technical Skills

Programming: Java, Python, JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: React, Tailwind CSS, React Context API, Responsive Web Design, UI/UX Fundamentals

Backend & Databases: Node.js, Express.js, REST API, PostgreSQL, MySQL, JWT, bcrypt

Tools & Platforms: Git, GitHub, Visual Studio Code, Eclipse, Postman

Concepts: OOP, Data Structures & Algorithms, Database Normalization, RESTful Architecture, Software Testing, Agile/Scrum

Soft Skills: Analytical Problem Solving, Debugging, Unit Testing, Team Collaboration, Time Management

Projects

LUXEMARKET — E-Commerce Website

Tech Stack: React, Node.js, Express, PostgreSQL, JWT, REST API, bcrypt

- Built a full-stack luxury goods e-commerce platform from scratch using React and Node.js/Express, featuring a PostgreSQL database with 12 normalized tables (users, products, orders, cart items, etc.), relational constraints, and server-side filtering with parameterized SQL queries for security and performance.
- Engineered a secure REST API with JWT authentication middleware, bcrypt password hashing (cost factor 12), role-based access control (customer/admin), and protected endpoints for cart, wish list, reviews, and admin dashboard supporting complete user authentication flow.
- Designed a responsive, component-based single-page application with React Context for global auth/cart state, reusable components (Product Card, Navbar, Cart Drawer), dynamic filtering/search, multi-step checkout, and admin panel for product/order/user management across all pages.

Velvet Vogue — Fashion Website

Tech Stack: React, Node.js, Express, PostgreSQL, Tailwind CSS, JWT, REST API

- Built a full-stack fashion e-commerce single-page application from scratch using React 18 and Node.js/Express, featuring a normalized PostgreSQL schema with UUID primary keys, relational integrity constraints, and optimized indexed queries.
- Engineered a secure REST API with JWT-based authentication, bcrypt password hashing, and protected cart endpoints using Express middleware supporting full user registration, login, and session management.
- Designed a fully responsive, component-based UI with Tailwind CSS and React Context for global state management, delivering a seamless shopping experience across Home, Men, Women, Cart, and Contact pages.

Doctor Channeling System — Appointment Management (CLI)

Tech Stack: Java, MySQL

- Built a command-line appointment scheduling system with automated queue management and notification workflows, handling concurrent booking requests via multi-threading.
- Applied OOP principles (inheritance, encapsulation, polymorphism) and database normalization (3NF), reducing data redundancy and improving query efficiency.
- Implemented multi-threaded scheduling that improved appointment processing throughput by handling simultaneous requests without data conflicts.

Dream Book Shop — Data Analysis CLI

Tech Stack: Python, Pandas, Matplotlib

- Designed a command-line analytics tool to parse and process bibliographic datasets (500+ records), generating automated visual reports on publication trends.
- Automated report generation workflow, eliminating manual data processing steps and reducing analysis time from hours to minutes.
- Produced data visualizations (bar charts, pie charts) revealing key insights on language distribution and publication frequency across genres.

Education

BSc in Computing (Software Engineering) — Reading	2026 – Present
Delivered by ESOF Metro Campus, Sri Lanka Awarded by Kingston University, UK	
Pearson BTEC Level 5 HND in Computing (Software Engineering)	Feb 2026
ESOF Metro Campus — Completed	
Diploma in IT (DITEC) & English (DIE)	Mar – Jul 2021
ESOF Metro Campus — Completed	

Additional Information

Languages: English | Tamil | Sinhala
Interests: Graphic Design | Photography | Tech Innovation
